

Let's shape the future of connected logistics!

Join our team at the Fleetboard Innovation Hub in Berlin as

Senior Frontend Developer (m/f/x) for the Fleetboard Logistics GmbH

With our new venture Fleetboard Logistics GmbH we will extend and improve the established products habbl and conizi and create a perfectly integrated experience with all Fleetboard products. For that we're currently setting up a new product development team at the Fleetboard Innovation Hub in Berlin.

Fleetboard is the digital brand for Mercedes-Benz Trucks, focusing specifically on connected trucks, logistics and transport management. Being one of the leading truck telematics providers in the world, we have equipped more than 240,000 vehicles with our system.

Our Berlin Innovation Hub is a space for invention and creation: We push the boundaries of connected logistics systems, enabled by the Internet of Things and Big Data. We are creatives, techies and scientists passionate to deliver digital innovations for those who move the world. Rapid prototyping and creating MVPs is our second nature. We are driven by seeing our ideas launching to the market on a global scale, and by evolving our products to solve our customers' pain points.

Your tasks will be

- Drive the development of web applications with a strong focus on UX
- Collaborate with designers (UX/UI) and backend developers to create a unique and holistic frontend user experience
- Design and automate test for web applications
- Build reusable code and libraries for future use
- Optimize applications for maximum speed and scalability

Relevant experiences

We love to hear from candidates with several years of commercial experience in developing complex web applications. You like to build web applications from idea to launch. You work on production-software with passion and always push your product to the next level in a challenging, past paced environments.

Education

Degree in Computer Science, Software Engineering or similar qualification and relevant work experience

Specific knowledge

- Expert-level knowledge of JavaScript, HTML5 and CSS3 (SCSS)
- Deep knowledge of Angular and TypeScript (we use Angular 7)
- Understanding the concepts of reactive programming and the redux pattern
- Building robust, fast and scalable frontends
- Familiarity with build tools like Gulp and Webpack
- Experience in developing and consuming RESTful APIs asynchronously
- Understanding of UX and UI design principles

You should be interested in

- Rapid development an independent DevOps team – you build it, you own it, you run it!
- Collaborating closely with your designer colleagues
- Rapidly learning new concepts and technologies and applying them in an agile manner
- Setting up CI/CD and monitoring
- Getting involved into backend topics, e.g. BFF development
- Structuring style sheets according to the BEM convention
- Learning about logistics

Nice to have would be

- Experience in Docker and Kubernetes
- Experience with Microsoft Azure and Azure DevOps
- Knowledge of back-end development, e.g. in Node.js, Python or C#/.NET Core
- Experience with Kibana, Prometheus and Grafana

And above all the motivation to work in a complex environment with lots of room for own ideas to optimize the status quo and take responsibilities to push state of the art digital solutions for connected trucks and the global logistics industry.

What we offer you

- Innovative working environment for the B2B pioneer in automotive connectivity solutions

- A thrilling project with global market impact
- An international and interdisciplinary team
- Attractive compensation package
- Creative atmosphere in co-working space Ahoy! Berlin
- Flat hierarchy, open collaborative culture, with English as primary language (German beneficial)
- Plenty of room for your own ideas and self-organized work to see your ideas come to life and scale globally
- Liaison with the Daimler group with the flexibility of a digital innovation lab

Location: Berlin
